

# The power of connectivity

Turning your every connection into opportunity.

# Empowering your business

One solution. One platform. One partner.

Business applications drive network needs — and they perform best on the scalable, modern fiber network from Spectrum Business.®

## Connectivity

### Internet portfolio

Solutions that power your business to perform at its full potential, delivering reliability, quality, accountability and an exceptional service experience.

### Private transport

Maximize network performance with reliable, scalable and secure private connections to clouds, data centers and critical locations.

## Voice and collaboration

### Unified communications

Seamlessly communicate and collaborate with calling, videoconferencing, messaging and more in a single application.

### Trunking

Maximize the value of premises-based PBXs with reliable, cost-effective, feature-rich and easy-to-scale PRI and SIP trunking solutions backed by a 100% uptime service-level agreement (SLA) guarantee.

## Managed services

Fully or co-managed services to suit your requirements.

### Advanced security

Mitigate risks with an integrated security solution managed for you by our network experts.

### SD-WAN

Quickly and easily expand your network to additional sites while improving application performance with intelligent routing capabilities.

### Cloud calling

Seamlessly integrate public switched telephone network (PSTN) calling and direct inward dial (DID) numbers within Microsoft Teams.

### Management portal

See and control your entire network from anywhere via a single, cloud-based portal.

### Switch

Reduce complexity by connecting your existing office infrastructure.

### WiFi

Deliver advanced WiFi 7 technology for greater speed and security that delivers simple access to your network for employees and guests.

# Connectivity no matter your need

## Secure Dedicated Fiber Internet

Dedicated internet backed by a 100% uptime SLA guarantee with managed cybersecurity powered by Cisco in an all-in-one package.

Security	Application requirement	Scalability	Installation	Reliability SLA
	Delay sensitive			100%

## Dedicated Fiber Internet

When performance is critical, provides low-latency connectivity and is backed by a 100% uptime SLA guarantee all the way to the handoff point at your location.

Security	Application requirement	Scalability	Installation	Reliability SLA
	Delay sensitive			100%

## Enterprise Internet

Enterprise-grade experience backed by a 99.9% uptime SLA guarantee all the way to the handoff point at your location.

Security	Application requirement	Scalability	Installation	Reliability SLA
	Delay tolerant			99.9%

## Wireless Internet

All-inclusive wireless internet, when service experience and network quality are important.

Security	Application requirement	Scalability	Installation	Reliability SLA
	Delay tolerant			Not applicable

# Understanding your business

## Business continuity and urgent needs

- Rapid deployment situations and temporary access
- Tandem connection with a wire line circuit for:
  - Business continuity
  - Application-specific data needs like point-of-sale terminal

## Single site

No to small IT department

- General business where latency is not critical
- Tandem connection with a dedicated circuit for:
  - Business continuity
  - Special / dedicated applications, i.e. guest access or IoT systems

## Multi-site

No to small IT department

- When bandwidth or reliability are necessary
- Applying network security without requiring IT expertise
- Branch network connection

## Multi-site

Medium to large IT department

- High bandwidth or bandwidth-intensive applications
- Configurable networks
- Data center access
- Consistent performance

# Solutions tailored for you

## Connectivity

How do your employees connect with critical applications?

- Dedicated or shared connectivity
- Ethernet
- Wireless internet

## Network security

How are you monitoring all security events?

- DDoS protection
- Advanced firewall
- Multi-factor authentication
- Zero trust network access

## Disaster recovery

What are the implications to your business if there is a system outage?

- Diverse connectivity
- Wireless internet
- Cloud connectivity

## Simplified network management

How are you optimizing your network traffic?

- Portal management
- SD-WAN

## Voice and collaboration

How current is your existing phone system?

- Unified communications
- Voice trunking
- Cloud calling

## LAN management

How do you manage, detect and monitor equipment on your internal network?

- Routers
- Switches
- WiFi
- Cameras
- Sensors

# Our commitment to you

## **Reliable connectivity**

We are committed to keeping you connected 100% of the time.

## **Transparency at every step**

Providing simple and easy access to managing your services 24/7.

## **Exceptional service**

Giving every detail the highest level of attention, driving results that move your business forward.

## **Always improving**

Turning feedback into action, continuously improving to deliver a superior customer experience.
