

What does network modernization mean for healthcare?

Explore the digital opportunities at your fingertips.

Today's digital transformation solutions empower healthcare providers in every corner of the industry. Predictive analytics and artificial intelligence (AI) bring new possibilities, from innovative care to enhanced patient satisfaction and workplace equity.

66%

of healthcare leaders say they've already adopted or are in the process of adopting predictive analytics.¹

92%

of healthcare execs believe digital transformation will improve patient satisfaction.²

24%

of healthcare executives say digital transformation has produced gains of more than 10% in profitability or performance.³

5 minutes

is the time it takes for a machine learning algorithm to construct high-quality MRI scans with a fraction of the data typically needed.⁴

96%

of healthcare leaders say that AI plays an important role in their efforts to reach equity goals.⁵

AI, machine learning and predictive analytics are becoming **essential tools** in healthcare. **Implementation requires a reliable network** with scalable bandwidth.

End-to-end management from a dedicated technology partner helps ensure you have the power and flexibility you need.

98% of healthcare leaders have an AI strategy or a plan for one.⁶

What's your plan? Is your network ready? When you collaborate with a team of industry experts, you can get the network support you need to implement new technology.

81% of healthcare organizations say they're not fully prepared for digital transformation in the areas of staff training and support.⁷

Get holistic, end-to-end, 24/7/365 support — from design to implementation to ongoing maintenance — with **managed services**, tailored to your needs.

Today's healthcare systems and providers are pulled in many technology directions. They must maintain and protect digital and virtual care interactions, keep IT teams staffed amid skill shortages, thwart increasingly sophisticated cyberattacks, and maintain a network resilient enough to deliver the innovative care they promise.

The challenges are real and the stakes are high.

SPECTRUM ENTERPRISE CAN HELP.

Ready to turn your tech challenges into opportunities for better patient outcomes?
