53%

of healthcare organizations have experienced at least one form of data breach in 2021.⁹

Financial services

\$5.85 million

the average cost of a financial services data breach.¹⁰

What can you do?

Ninety percent of IT professionals lack confidence that their network is secured against attacks or breaches.¹¹ Leaving your network vulnerable to external threats can impact your bottom line. A fully managed security solution can reduce the burden on your IT department by safeguarding your network, while also ensuring high performance and visibility.

- Block suspicious activity and help secure your network connections.
- Receive automatic updates to security patches and software.
- Control employee access to unauthorized Internet sites.
- Secure your data to remote workers using VPN connections.
- Offload network support requirements to focus on more strategic initiatives.

Help protect your network against threats with Managed Security Service from Spectrum Enterprise.
