

Upgrade the e-grocery experience

Add speed and security as more customers shop online.

14%–18%

Projected share of e-grocery sales in the next three to five years.¹

Upgrading bandwidth can create:

Faster transactions

Happier customers

Increase customer loyalty

Boost sales volume

Get security where it counts.

Managed firewalls

Safeguard customer data

Defend against cyberattacks

Update protection automatically

DDoS protection

Thwarts volumetric attacks

Blocks malicious traffic

49% of consumers buy groceries online at least weekly.²

Improve the experience for your shoppers online and in store with increased network performance.
