

Managed Security Service

Protect your network with a managed and maintained next-generation firewall.

Organizations must safeguard against internet threats while protecting their network operations. But maintaining the proper security requirements to make this happen can strain internal IT teams. Powered by Fortinet, Managed Security Service from Spectrum Enterprise reduces the day-to-day burden of your networking tasks by providing a fully integrated firewall with router that includes network design, installation and support.

Product highlights

- **Continuous support:** Provides an integrated and managed service to remove the complexities and configuration risks associated with a self-managed security solution.
- **Personalized design:** Built for your unique needs.
- **Simplified network security and management:** Integrates internet connectivity and device support to secure information and support remote workers across all locations within the U.S.
- **Compliance support:** Keep up-to-date with security requirements including HIPAA with encrypted VPNs for data privacy while in transit, and CIPA with student internet access that is protected by content and web filtering.
- **Real time insights:** Access firewall inventory, equipment activity and event resolution to track internet-borne threats.
- **Scalable remote access:** Enables remote workers to securely connect to the network via encrypted VPNs with no additional licenses to buy and with support for up to 50,000 users.

Key features

- Maximize value with a managed service that offers 24/7/365 assistance for security performance that includes up-to-date security policies; and is supported by our local technicians and network operations center.
- Choose from two security packages that include design, installation, equipment and support.
- Keep security top-of-mind with nationwide availability of security functions that are integrated with network routing, traffic handling protocols, and managed VPN for site-to-site and individual VPN tunneling.
- Help eliminate risks and threats with network protection delivered through a broad firewall and security solution including unified threat management (UTM) features, intrusion protection, URL and content filtering.
- Improve insight with reporting and network visibility through service portals available 24/7/365.

Managed Security Service packages

Feature	Standard package	Advanced package
Stateful firewall	•	•
IPsec VPN (site-to-site)	•	•
Remote user VPN	•	•
Network Address Translation (NAT)	•	•
Port forwarding	•	•
VLAN management	•	•
Zone-Based Firewall (ZBF)	•	•
Proxy settings	•	•
Client authentication source integration (LDAP, Radius)	•	•
Routing capabilities	•	•
Intrusion Prevention System (IPS)		•
Anti-malware/antivirus protection		•
Web content filtering		•
DNS protection (filtering, sinkholing, spoofing)		•
SSL/TLS deep packet inspection (Decryption)		•
Web/URL filtering categories and block listing		•
