SOLUTION BRIEF

Services from Spectrum Business

Create compelling, digitally enabled user experiences with modern technology infrastructure from Spectrum Business®. We unite technology and expertise to achieve your vision with networking, voice, collaboration, security and TV services managed to your exact needs. Our dedicated team of industry experts work with you to design a solution that's tailored to your organization's unique needs, so you can empower your business for long-term growth.

Streamline connectivity

Support your organization with highly reliable internet and managed network solutions.

Dedicated Fiber Internet: Achieve dedicated internet connectivity with symmetrical upload and download speeds, bandwidth up to 100 Gbps and backed by a service-level agreement (SLA) that guarantees 100% uptime all the way to the handoff point at your location.

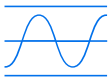
Secure Dedicated Fiber Internet: Connect with confidence when you integrate fast, dependable, dedicated fiber internet service with enterprise-level cybersecurity protection in one affordable and remarkably simple solution backed by an SLA that includes a 100% uptime guarantee.

Wireless Internet: Connect to the internet via a wireless solution that helps keep your business running with temporary or secondary internet access over 4G or 5G LTE Advanced technology. This all-inclusive wireless internet service comprises equipment, installation and support.

Enterprise Internet: Gain fast, reliable and cost-effective access to the internet or cloud-based applications with an enterprise-grade experience. Available in a range of speeds up to 1 Gbps, the solution provides peace of mind with an SLA that includes 99.9% uptime and a rapid restoration commitment all the way to the handoff point at your location.

Ethernet Services: Meet ever-growing data needs by connecting locations with a fast, reliable wide area network (WAN) solution backed by a 100% uptime SLA guarantee and built on a dedicated fiber infrastructure. Bandwidth up to 100 Gbps is available.

Cloud Connect: Extend your network with fast, secure and dependable private connections to cloud service providers with a service backed by a 100% uptime SLA guarantee.



Wavelength Services: Ensure fast data transfer for your most demanding applications, including critical cloud services, data center connectivity and data replication via high-speed, dedicated WAN connectivity with bandwidth up to 100 Gbps.

Enterprise Network Edge: Improve the network experience for your teams with an enterprise-grade managed solution that brings together connectivity, equipment and network management to support both hybrid networks and workforces. Powered by Fortinet, the solution simplifies IT operations by providing networking with security features and optional integrated WiFi and switching in a multi-cloud-ready platform.

Managed Network Edge: Simplify the deployment and management of your network with this modular, all-in-one solution. Delivered over the Cisco Meraki platform, Managed Network Edge offers security features, routing, SD-WAN, WiFi, switching, smart cameras and environmental sensors. Achieve flexibility and scalability with connectivity, equipment and network management from a single partner.

Managed Router Service: Efficiently route traffic and improve bandwidth use without investing in hardware or day-to-day management.

Spectrum BUSINESS®

Strengthen security

Enhance network management with solutions that help protect your organization from cyberattacks.

Secure Access with Cisco Duo: Help protect your organization from unauthorized access to sensitive systems, regulatory violations and data loss that can disrupt your business. Capabilities that include multi-factor authentication (MFA) and identity management allow IT to set access policies by user and device, regardless of location.

Cloud Security with Cisco+ Secure Connect: Allow remote users to access cloud SaaS applications and the internet securely and directly without reliance on a traditional centralized or premises-based security solution. This feature-rich cloud-based security service includes secure web gateway, cloud access security broker, identity management, zero trust network access (ZTNA) and more.

DDoS Protection: Help guard against malicious volumetric attacks designed to overload your network and prevent access to applications, systems and information with fully managed distributed denial of service (DDoS) threat identification and mitigation.

Support collaboration

Keep employees connected to maximize accessibility.

Enterprise Trunking: Maximize the value of premises-based PBXs with reliable, cost-effective, feature-rich and easy-to-scale PRI and SIP trunking solutions, backed by a 100% uptime SLA guarantee. Enterprise Trunking offers multiple service options that can provide automatic rerouting, equipment redundancy and full path diversity to ensure you never miss a call.

Unified Communications: Answer communication and collaboration needs with a fully managed, cloud-based voice solution that brings together calling, messaging, meetings, virtual workspaces and more in a single application that delivers a unified experience for today's mobile, on-the-go workforce.

Hosted Call Center: Create reliable, consistent client interactions with the ability to scale to meet evolving needs and support call center operations with robust analytics, reporting, multi-channel communications and CRM integration.

TV: Inform your organization with premium programming and custom content.

- **Set Back Box TV:** Provide a reliable and homelike TV viewing experience that improves loyalty, satisfaction and entertainment through a large variety of channel lineups, premium packages and on-demand content.
- **Fiber Connect Plus TV:** Deliver an HDTV experience that informs and entertains with a direct connection from the cable wall outlet to the TV, eliminating the need for in-room equipment.
- **SpectrumU TV:** Deliver live and on-demand streaming TV for students to watch anytime, anywhere on campus using personal devices.
- **Moviebeam:** Pair live TV with video-on-demand and over-the-top applications for guest and concierge services with this comprehensive, interactive in-room technology solution.
- **TV Streaming Access:** Offer live and on-demand TV programming delivered to personal devices.

Technology that works for you

Let us help you accomplish what it takes to reliably and effectively modernize your network and meet the needs of your organization.

The right partner for your digital journey

Digital transformation is reinventing almost all aspects of our lives. To anticipate and maximize new opportunities requires a technology partner that can fully support you every step of the way. Spectrum Business has vast expertise, successfully guiding organizations throughout their digital journey.

We know the limitless possibilities that our technology solutions can bring to your organization. We are committed to partnering closely with you to understand your unique needs, create solutions to help reach your goals and be there for you when you need help.
